DETAILED ACTION

Amendments

1. Applicant's Response filed on 07/31/03 has been received and entered into the file. No claims have been amended. Claims 1-11, 13-18, 20, and 21 are pending in the instant application.

Claim Rejections – 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-11, 13-18, 20, and 21, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by US/5,835,732 to Kikinis et al., (Kikinis).

Art Unit: 2835

Regarding claims 1 and 17, Kikinis disclosed (Fig. 1-6 and 20) a keyboard (60, 151) comprising: a housing having substantially a form factor of personal computer keyboard (Fig. 20); a plurality of keys disposed within the housing; a communication link (26') disposed within the housing (Fig. 6), wherein the communication link (26') is capable of communicating with a computer (66); and,

a connector (14') operatively coupled to the communication link (26'), said connector disposed within the housing and receptive to a corresponding connector (14) of a PDA device (10) such that the PDA device (10) communicates with the computer over the communication link (26'') when the connectors (14 and 14') are coupled, (column 4, lines 46+).

Regarding claim 20, Kikinis further disclosed that said PDA device (10) has a touch screen (16), (column 4, lines 56+).

Regarding claims 2-4, 18, and 21, Kikinis disclosed that the housing has a plurality of surfaces (an end surface within the docking bay into which the connector (14') is disposed) defining a cradle cavity (i.e. a docking bay) shaped so that the device (10) fits into the cavity such that at least one surface (front surface) of the device (10) is exposed, (Fig. 5).

Regarding claim 5, Kikinis disclosed that top and bottom surfaces of the device (10) are flush with the corresponding surfaces of the housing, (inherited in the structure, since the device (10) is inserted in a docking bay).

Regarding claims 6-8, and 13, Kikinis disclosed that the communication link may comprise serial cable or infrared (wireless) transceiver (column 1, lines 37+).

Art Unit: 2835

Regarding claims 9, 10, and 15, Kikinis disclosed a power source operatively coupled to the connector (14') of the keyboard to recharge a battery (15) of the device (10), (column 6, lines 3+).

Regarding claim 11, Kikinis disclosed that said device (10) is a personal digital assistant (PDA) operable in a docking mode or stand-alone mode (column 4, lines 46+; column 6, lines 3+).

Regarding claim 14, Kikinis disclosed that said device (10) has a touch screen (16) having at least one virtual key (column 4, lines 56+).

Regarding claim 16, Kikinis disclosed that said device (10) is a telephone handset, (column 14, lines 27+).

Response to Arguments

4. Applicant's arguments filed on 07/31/03 have been fully considered but they are not persuasive.

The main thrust of the arguments regarding independent claims 1, 17 and 20 is directed to the assertion that Kikinis ('732) as shown on Fig. 6: "does not disclose that connector 14' is disposed within a housing for a keyboard, rather Kikinis illustrates that connector 14' is disposed on a host computer 66." (see Response, p. 7, lines 3+).

On the contrary, the Examiner believes that claims read on the Kikinis reference, since the keyboard and the host computer are integrated in the same housing as depicted on Fig. 5.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
